How to grade my
*adjustable* **Palazzo Pants**
pattern up to ANY size

First you need to take your
**Waist, Hip + Crotch Length** measurements:

Measure your **waist** the whole way around
the body, just above the belly button

For this pattern it's best to take the hip measurement at the point you're the largest: this could be **lower belly**, **classic hip**, **around the bum** or even **upper thigh**

The Crotch Length measurement is taken from the **back waist point**, down through the legs and back **up to the front waist point**
Draw these **5 adjustment lines** onto the
Size Large Main Leg pattern piece,
being careful to **stay square to the grain line**

Cut along lines 1 + 2 and add paper underneath to expand the pattern evenly by **1.5"** at each split, keeping the pieces **parallel at the kneeline** and **hem**

5

1.5"

1.5"

Palazzo Pants

Main Leg
Cut 1 Pair Self

1

3

4

2
Next cut along **line 3** and expand by **2"**

5

2"

Palazzo Pants

Main Leg

Cut 1 Pair Self

3

4

2

Now cut **line 4** - the amount for expansion is
your hip measurement minus 52"
e.g. a 60" hip minus 52" = 8"

5

HIP MEASUREMENT - 52"

Palazzo Pants

Main Leg
Cut 1 Pair Self

1   3   4   2
**NOTE: If your waist is larger than your hip
use that measurement here instead*

Next cut **line 5** and the amount for expansion is
(your crotch length measurement - 30″) divided by 2
e.g. (a 40″ crotch - 30″ = 10″) ÷ 2 = 5″

5 **(CROTCH LENGTH - 30″) ÷ 2**
